Subject: new federal ccf

Charles,

Item #1.

Please consider using fewer copies for the new federal CCF.

1. practically no one sends a paper copy to the MRO- they FAX the copy instead
2. practically no one sends a paper copy to the company- again they FAX the copy instead

Why not reduce the # of copies to match the work flow of the collection sites?

Item #2.

On demand CCFs also make sense.

Why lock us into old technology if we can produce a CCF whenever it is needed when needed.

Right now there is a tremendous amount of waste in pre-printing & distributing CCFs.

Item #3.

Please allow more time for the lab to use old forms.

If a MDMA, MDA, or MDEA comes up Positive- the labs can write this on the CCF.

Thanks for your consideration,

David K. Roberts, Ph.D.
