Robert L. Stephenson II, M.P.H., Director,
Division of Workplace Programs (DWP),
Center for Substance Abuse Prevention (CSAP),
1 Choke Cherry Road, Room 2-1035,
Rockville, MD 20857.

Dr. Robert Stephenson:

Thank you for your desire to improve the CCF and the testing industry. Much change occurs as we experience 2010. We are all concerned for the donor of the specimen. Quality and precision is important.

I totally agree with DATIA regarding the CCF in the aspects of paperwork. Paperwork is much. Computerized paper work will agree with technology and allow all professionals related to the drug testing industry to work proficiently and with protection for all. We would appreciate your consideration and agreement with DATIA who represents us in every way. I appreciate DATIA that represents me in my profession.

There is much to consider in way of the CCF. The donor needs protection and the testing industry need proper support and direction.

Thank you for your attention and concerns.
